READ THE FOLLOWING BEFORE USE!

AREA OF USE:
This helmet is designed solely for skiing, snowboarding and mountaineering. This helmet is not recommended for canoeing and white water sports, but for white water rescue only. It is not intended for use in white water classes 5 and 6 as given by the International Canoe Federation. This helmet is designed to help protect from bumps, scratches and concussion. This helmet is not suitable for moped riders, motorcyclists, or any other form of motorized activity.

WARNING!
No helmet can protect the wearer from all potential injuries in all accidents. Depending on the strength of impact, even an accident at very low speed can cause serious injury or death. This helmet is designed to protect your head. It does not offer protection from injuries to the neck, the spinal column, or other parts of the body at risk in an accident. For maximum protection, this helmet must be fitted and attached properly to the wearer's head in accordance with this user manual.

WARNING!
This helmet may, after sustaining an impact, be damaged to the point that it is no longer adequate to protect the head against further impacts. This damage may not be visible. If this helmet has sustained an impact it should be returned to Sweet Protection for competent inspection or be discarded and replaced.

WARNING!
Children should not wear the helmet while climbing or engaging in other similar activities due to the strangulation risk from the helmet straps.

WARNING!
Action sports (skiing, snowboarding, kayaking, white water sports, mountain biking, mountaineering etc.) are inherently dangerous, since they involve speed, heights, natural and man-made obstacles and physical exertion. This product is

scientifically designed to reduce the probability of injury when used properly. However, Active Brands AS makes no claims that this helmet will eliminate all risk of injury even when properly worn. For maximum protection, this helmet must be fitted properly and all adjustments secured. All our helmets are thoroughly tested and certified for their specific branch of sports and intended use. Never use a helmet for activities it is not intended for.

OCCIGRIP:
Your helmet features OCCIGRIP adjustment. Please follow the diagram instructions for how to make the proper adjustments.

FIT PADS:
If your helmet is supplied with FIT PADS, Please follow the description in the Fit Pad manual.

USER INSTRUCTIONS:
Allow the necessary time for adjustments the first time you try a new helmet. If the fitting procedure seems complicated, ask the retailer to help you adjust for a good fit. Test your helmet fit each time you put it on. Adjust as needed. If the helmet is to be worn by a child, it must be fitted and adjusted by an adult.

FITTING THE HELMET:
Putting on the helmet: Align the front rim of the helmet above your eyebrows. Hold the straps on both sides and roll the helmet over the back of your head. Make sure the front is low against the forehead; otherwise no size or model will fit or protect you correctly. There should be minimal or no gap between the helmet and your eyebrows. Once the helmet is on, the next step is to check for comfort and gaps. The comfort padding should be flush against the forehead with no large gaps. The back of the helmet should not cover the nape of the neck. Make sure the helmet is positioned all the way down on the head.
Fit test: Gently roll or lift the helmet off your head. If the skin on your forehead moves slightly, you have a good fit.
Proper use: Always adjust and secure the chin strap buckle before use. Adjust the straps to retain the helmet in place. Finally, adjust the two-point harness for perfect fit and protection. Both straps on each side should have the same

tension. Checking the straps: Grab the helmet with both hands while it is sitting firmly on your head and attempt to take it off by pushing it, to the extent that you can, forwards and backwards. IMPORTANT! If you can push your helmet so far forward that your view is obstructed or so far back that your forehead is exposed, then your helmet is not properly fitted. If so, go back to sections 1 and 2 and repeat the steps for adjusting the helmet. Make sure that your helmet feels comfortable. Go out and enjoy the ride!

NOTE:
For some wearers the helmet may not fit due to the difference between the shape of the helmet and the shape of your head. If so, you may have to try different models to find the right one for you.

NOTE:
Before each use of this helmet, make sure that no parts are broken, cracked, torn, worn or missing.
Please treat this helmet as a personal item and avoid lending it to others.

Replacement: This helmet is made to absorb some of the potential energy of a blow. Even though damage may not be visible or apparent, it is imperative to discard and replace any helmet that has sustained a major impact in an accident, or has received a similarly severe blow. An inspection of the helmet might not reveal any apparent damage, but it might be there. Sweet Protection also advise that any helmet should be replaced after three years of normal use, or sooner if exposed to long periods of sun, hard use, or any contact with chemicals. The helmet must also be replaced if it does not fit anymore.
For cleaning, use clean water (max temperature 30°C) and mild detergent only. Leave to dry naturally and not in contact with direct heat or on a hot surface.

WARNING:
Do not apply paint, solvents, adhesives or self-adhesive labels, except in accordance with instructions from the helmet manufacturer This may drastically reduce the protection provided by this helmet.
The helmet will be damaged if exposed to temperatures exceeding 62°C (approx. 150°F). Do not leave the helmet in

a car (or similar) in hot weather, as it may easily exceed this temperature. If exposed to such temperatures, the helmet must be immediately discarded and replaced.
The helmet will not perform as intended if you modify or replace any of the original elements included in the helmet. Please note that any customizing is not recommended, and that this will invalidate the warranty. Sweet Protection or its distributors accept no liability for damage or injuries resulting from misuse or from a modified helmet.

When stowing or transporting the helmet, use the original protective packaging the helmet came in. After use, the helmed should be stored unpacked in a cool, dry, dark place away from heat sources, frost, high humidity, corrosive substances or other potential causes of damage. During transportation, take care to protect the helmet against damage from sharp or heavy, falling or crashing objects. Please retain the original packaging your helmet came in for use in transporting it, or in case you need to return the helmet, due to a defect under warranty, to the store where you originally purchased it.
Accessories and spare parts: accessories and/or replacement parts are available from the Sweet Protection catalogue. Use only original accessories supplied by Sweet Protection.

WARRANTY:
Our mission is to design and engineer the best possible products. We always seek to use the most advanced materials, technology and production methods. Sweet Protection helmets come with a one-year warranty against defects in workmanship and materials. We will replace or repair a properly used helmet that is defective if returned within one year of purchase. Please note that this warranty is limited to the original purchaser only. This warranty does not apply if damage is caused to the helmet through abuse, negligence, improper repairs, inadequate fit, any modifications or alterations, or if used other than intended.

WARRANTY CLAIM PROCESS:
Before returning any product, you must contact Sweet Protection by phone or e-mail to obtain a return address and authorization.
E-mail: customerservice@sweetprotection.com
Ensure that the returned product is washed, clean and dry before

shipping. Dirty and/or foul smelling products will be returned unprocessed or may delay the process and will be subject to a surcharge.
Remember to include a note with your name, address and phone number, and take care to include a short statement explaining the warranty problem. Alternatively, you may also return your product to the store from where you originally purchased the product. Any Sweet Protection dealer will be able to handle the warranty claim process on your behalf. US/ Canadian citizens: Sweet Protection makes no other express warranties or guarantees, except as otherwise specifically stated. Any warranties implied by law shall be limited to ninety (90) days in duration. Some states do not allow limitations on how long an implied warranty lasts; therefore the above limitations may not apply to you. Sweet Protection shall not be liable for any incidental or consequential damages. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state.

CERTIFICATION:
This Sweet Protection helmet is designed to protect against impact caused by collision of head with an obstacle while doing skiing, snowboarding, and mountaineering. **This helmet is certified according to the following standards to show conformity to the EHSR of Regulation (EU) 2016/425:**

EN 1077:2007 - Class B - Helmet for alpine skiers and for snowboarders. Class A and class B helmets are for alpine skiers, snowboarders and similar groups. Class A helmets offer comparatively more protection. Class B helmets may offer greater ventilation and better hearing, but protect a smaller area of the head and give a lesser degree of protection from penetration.

EN12492:2012 - Helmet for mountaineering.

This helmet conforms to all requirements according to EN 1385:2012 - Helmets for canoeing and white-water sports, with exception for coverage in the front area to accommodate safety goggles. This helmet is not recommended for canoeing and white water sports, but for white water rescue only.
